The Artistry of Karl Goetz

Karl Goetz, the German medallist, was born in Augsburg in 1875. After studying at various German Art Schools and briefly residing in Holland and France, he settled permanently in Munich in 1904. Goetz died there in 1950 leaving a legacy of over 730 medals recording and commemorating a half century of tumultuous German history. His work sometimes satirizes and other times pays tribute to the people and events from the period of the Empire through the end of the Third Reich. The works of Goetz offered in this sale include an outstanding collection of original plasters from the Goetz studio and a large selection of medals.

These plasters represent unique specimens of original art. Unlike our previous offerings of plasters by Fraser and Sinnock which were working models or studies of the finished medals, these are negative or incuse designs. In order to demonstrate the role and relevance of the plasters to the finished product, a brief description of his method is in order.

For portrait medals, Goetz modeled the portrait in plasticine or other modeling material, then made a negative impression of it in high quality white alabaster plaster. Details like eyes, ears, hair, clothes, all lettering, and always the entire reverse were cut directly into the plaster with small tools. From the finished negative, he cast a plaster positive which was touched up if necessary. He could modify the lettering as changed in the negative (Lot 19) or parts of the design (Lot 5 and 26). He usually cut his signature appearing on the truncation in the positive. A sandform was made from the positive, covered with graphite powder, and fired in a kiln. Obverse and reverse were then joined, and two holes made for the air to escape and the metal to be poured in. He would use this model medal for further sandforms to make the final cast medals. He also created model positives through the galvanic method from the plaster positive. If the medals promised to sell well, he reduced their size mechanically for striking but in this process much detail was lost (compare Lot 11 and Lot 21 with the 36 mm size medals!).

Over the years, most of the plaster models were broken and/or destroyed during the air raids in World War II. The desirability of these remaining plaster negatives is due to the attractiveness of the designs and their uniqueness; each is a one of a kind, handmade work of art in its own right.

The most readily available medals are the World War I satirical medals. The scarcest are generally all of the large silver medals and some of the private issues. Struck silver pieces of the World War II era are extremely scarce since their number was quite limited and required the exchange of an equivalent measure in silver coins.

We have used the book, "The Medals of Karl Goetz" by Gunter W. Kienast, for reference in cataloging these plasters and medals. This well illustrated book provides a wealth of useful and interesting information both about Goetz and the historical background of events he portrayed in medallic form. We recommend the book for everyone who finds these medals interesting (Autographed copies may be ordered from us at \$38 each).

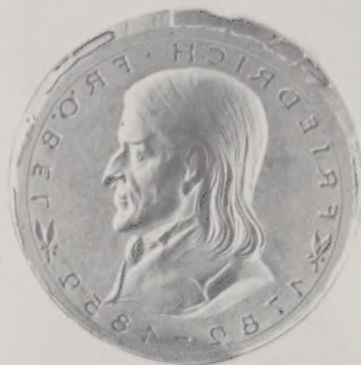

Goetz identified his medals by "Opus Numbers," as we have done here. This scheme was not devised to fall in precise chronological order however, as it was not started until the 1920's. The size and metal are indicated for each lot, but not whether struck or cast unless it deviates from the expected based on size or is known to have been produced by both methods. Generally, the larger medals are cast bronze while the smaller pieces are struck bronze or silver. Most of the struck medals have a matte finish. This combined with the rounding of detail on the cast medals has in effect caused us to possibly undergrade many of these lots. This extensive listing of Goetz medals represents one of the largest selections ever offered for auction. It should be noted that the size of the plasters as mentioned in our catalog, is for the design area only.

HOT AIR PAGE

Once again we are pleased to feature a significant specialized offering as part of a general sale. We were fortunate to receive several large holdings of Goetz material, both plasters and medals, each of which complimented the other to form this outstanding section.

Our next sale to be held at the I.N.S. Convention in Toronto, will also feature a specialized section. We are pleased to offer the Richard Buckley Collection of Breton tokens.

We regret that we have had delays in listing some consignments. Sometimes we receive material which just does not fit in a particular sale and we hold it for a future sale. In this vein, the next sale which will have extensive listings of medals and literature, will be February 4, 1982.

Due to ever increasing costs, we will be raising our annual subscription rates beginning with the November sale (No. 43) to \$15 for U.S. and Canada, and \$20 for overseas subscribers. We will offer a three year subscription for \$35 and \$50 respectively. You can renew or extend your subscription now at the old rate.

We are currently looking for an experienced individual to manage our retail store of U.S. coins and bullion trading. Inquires and resumes are invited.
